

Manager of Therapeutic Physics

Horizon Health Network (Horizon) is seeking a Medical Physics Leader with a proven record of clinical and academic leadership to be our next **Manager of Therapeutic Physics**. Committed to the highest clinical and academic performance and standards, and leveraging highly developed interpersonal, teamwork, and leadership skills, the Manager provides both Academic and Clinical leadership to a high performing team of clinical and academic medical physics staff within the Oncology Program at the Saint John Regional Hospital.

Working for Horizon Health Network

At Horizon Health Network, we offer a challenging work environment supported by an excellent network of dedicated professionals. We offer competitive salary, a comprehensive benefits program, relocation assistance, development opportunities, and a recognition program.

Horizon Health Network's vision is to provide Exceptional Care. Every person. Every day. Horizon Health Network is the largest health network in Atlantic Canada and is the second largest employer in New Brunswick with over 13,000 staff and 1000 physicians in over 100 facilities, clinics, and offices.

Department of Radiation Oncology

Our Radiation Oncology Program is recognized as a center of excellence for the diagnosis and treatment of malignant disease. We offer a comprehensive service to provide tertiary adult cancer care to the citizens of New Brunswick.

Job Responsibilities

Reporting to the Oncology Program Administrative Director, Saint John Regional Hospital, the Manager provides strategic and operational leadership for Medical Physics, as well as directing the associated research and educational mandates of the team.

Leading a diverse team of professional and technical staff, the Manager is responsible for managing all resources required to maintain services and integrating research and academic programs within the clinical service program. Direct reports include highly functioning professionals whose primary focus is direct patient care and require an operational leader that supports a team centered and accountable approach to practice with a focus on key performance indicators and quality of care.

The Manager is responsible for all operational needs of the Medical Physics department and team ensuring high quality patient care and access. The Manager must anticipate

challenges, healthcare trends and increasing demands for services while developing an agile strategy capable of maintaining and enhancing patient care today and into the future. This leadership role is accountable for the oversight, development and integration of programs that support a comprehensive medical physics team within clinical operations.

Job Qualifications

The successful candidate will have a PhD in Medical Physics and with a FCCPM designation or equivalent designation. This is combined with a minimum of 7 years of health care and Medical Physics leadership experience.

Application Process

Interested applicants must email their application by **October 7th, 2022** to Lisa.Robinson@HorizonNB.ca
