

Medical Physicist, Radiation Therapy (BC Cancer – Vancouver)

Medical Physicist, Radiation Therapy
BC Cancer – Vancouver

Job Type: Regular, Full-time

Salary Range: \$174,258 - \$261,387/ year

Location: 600 W 10th Ave, Vancouver, British Columbia

BC Cancer – Vancouver is seeking applicants for a permanent, full-time Medical Physicist position.

The successful applicant will join a team of 25 medical physicists, 2 medical physics residents, 5 physics assistants, 6 radiation therapy service technicians, and 3 tool and die makers, which supports the large and diverse radiation therapy program in Vancouver. Equipment-wise, Vancouver has 7 TrueBeam linear accelerators, 2 Ethos units, an incoming Radixact unit, 2 CT simulators, a Flexitron afterloader, and AlignRT and Identify surface guidance systems. Software includes Eclipse, Raystation, Oncentra, and VariSeed treatment planning systems; a provincial ARIA oncology information system; and MIM. Special therapy techniques include VMAT TBI, adaptive RT, gating and tracking motion management, SRS, SABR, TSEI, gynecologic-focused HDR brachytherapy, and prostate and eye plaque LDR brachytherapy programs. Additionally, the successful applicant will have the opportunities to contribute to advancing the existing MR program, automated planning and ESAPI scripting, re-irradiation, custom-device fabrication in collaboration with our machine shop, and clinical trials.

Beyond the clinic, there are ample teaching and mentorship opportunities within the province-wide residency program and the medical physics graduate program, based at the University of British Columbia (UBC). Applicants are also encouraged to pursue research and clinical development, as well as adjunct or clinical professor appointments at UBC.

Nestled between ocean and mountains, Vancouver, British Columbia offers an exceptional blend of natural beauty and urban sophistication. The city is known for its vibrant arts and culinary scenes, diverse neighbourhoods, and easy access to outdoor adventures - from oceanside strolls along the world-renowned Seawall to skiing just minutes from downtown. Consistently ranked among the world's most liveable cities, Vancouver provides a healthy, active lifestyle with stunning mountain and waterfront views, fresh air, and a welcoming, multicultural community.

When you click the link below to apply, the posting will reference a Senior Medical Physics position. However, we still encourage applicants with a Ph.D. (preferred) or M.Sc. in physics and completion of a CAMPEP accredited residency program to apply. MCCPM or equivalent membership is required within 2 years of entering this position. Relocation assistance is available.
